

Machine Comparison Guide

Pulse PEMF offers multiple PEMF (Pulsed Electromagnetic Field) generators to meet diverse needs across the wellness spectrum. As a comprehensive innovator of PEMF, we design, manufacture, sell, support, and service our products directly. This comparison document provides in-depth information on each of our Pulse PEMF machines, enabling you to make an educated decision on which is best suited for your needs.

PULSE XLTM
SOLID STATE SYSTEM PRO

Pulse XL Pro

- **Solid State Technology.** The Pulse XL Pro employs innovative solid-state engineering to provide smoother pulses and a more pleasant user experience. The semiconductor device in this machine replaces moving parts to eliminate regular maintenance and provide signature, smooth pulses.
- **Strength.** Our strongest, most innovative machine to-date provides a Pulsing experience beyond comparison.
- **Full Control of both Magnetic Field Strength (MFS) and Pulses Per Second (PPS) Settings.** The Pulse XL Pro machine features 3 knobs for ultimate user control of pulses per second, magnetic field strength, and session time. Customize your session with a combination of 0% to 100% MFS and any of 19 different PPS settings, ranging from 1.0 to 9.9 PPS.
- **Custom Timer with Display.** Set your timer as desired, from 2 to 90 minutes, or use the infinity setting to go as long as you want.
- **Dual Accessory Capability.** Power up to two accessories simultaneously with the Pulse XL Pro's dual outlets, allowing for a more customizable experience.
- **Safety Accessory Plug.** The Pulse XL Pro comes with a safety accessory plug, as this machine is equipped with a safety feature that only distributes power when both plugs are fully seated.
- **No Maintenance Required.** This innovative solid-state system requires no regular maintenance.
- **Aircraft Quality Aluminum Case.** The Pulse XL Pro is enclosed in high-quality aluminum for maximum protection of the internal system, durability, and professional appearance.
- **Attachable Wheels.** The Pulse XL Pro comes with attachable caster wheels for easy room-to-room transport.
- **Three Year Warranty.** All of our machines are backed by the protection of our complimentary 3-year Limited Warranty.

Who purchases the XL Pro?

The Pulse XL Pro is our ultimate machine and the finest in professional-calibre PEMF. The most common owners of this machine are Doctors, Wellness Facilities, High Performing Professionals and Executives, Spas, Biohacking Centers, and individuals who want the most elite PEMF device in the comfort of their own home.

Pulse EQ-XX

- **Mechanical machines, Powered by Spark Gaps.** The Pulse EQ-XX's dual machines use a spark gap between two adjustable terminal rods to generate a mechanical pulse range. More space between the terminals generates a higher pulse strength and lower pulse rate while less space between the terminals generates a pulse with less strength at a higher pulse rate.
- **Strength.** Our most innovative, versatile PEMF machine for animals provides the same power as the EQ-X, with one dedicated machine for each accessory.
- **Infinity Timer.** Each side of the Pulse EQ-XX machine has an infinity timer, which functions as a simple on-off switch.
- **Double Power & Dual Accessory Capability.** Power up to two accessories simultaneously with the Pulse EQ-XX. Unique to this machine, the dual outlets are powered and controlled independently, providing more than double the power and session customization (including dual user capability).
- **Minimal Maintenance Required.** The spark gap assemblies have moving parts that require scheduled maintenance at approximately every 800-1500 hours for maximum performance.
- **High-Impact Plastic Pelican Case.** The Pulse EQ-XX is enclosed in high-quality, high-impact plastic for durability.
- **All-Terrain Wheels.** The Pulse EQ-XX comes with an attachable, all-terrain, 6-inch-wheeled cart so you can take it with you anywhere.
- **Three Year Warranty.** All of our machines are backed by the protection of our complimentary 3-year Limited Warranty.

Who purchases the EQ-XX machine?

The Pulse EQ-XX has attracted a wide audience for its dual-powered accessory design, enabling owners to offer two individual sessions simultaneously without splitting the strength. Veterinarians, Animal Wellness Professionals, Equine and Livestock owners, and Trainers alike maximize their Pulse PEMF businesses with this extremely versatile machine.

PULSEEQXX™

PULSE X1™

Pulse X1

- **Mechanical Machine, Powered by Spark Gap.** The X1 uses a spark gap between two adjustable terminal rods to generate a mechanical pulse range. More space between the terminals generates a higher pulse strength and lower pulse rate while less space between the terminals generates a pulse with less strength at a higher pulse rate.
- **Strength.** The Pulse X1 is our strongest spark-gap machine. With approximately 70% of the power of the Pulse XL Pro and 20% more strength than the Pulse X, this versatile machine is the perfect midsized machine.
- **Both MFS and PPS Settings are controlled with a single knob.** Adjust the strength to your comfort and tolerance level with one simple knob.
- **Custom Timer with Display.** Set your timer as desired, from 2 to 90 minutes or use the infinity setting to go as long as you want.
- **Dual Accessory Capability.** Power up to two accessories simultaneously with the Pulse X1's dual outlets, allowing for a more customizable experience.
- **Safety Accessory Plug.** The Pulse X1 comes with a safety accessory plug, as this machine is equipped with a safety feature that only distributes power when both plugs are fully seated.
- **Minimal Maintenance Required.** The spark gap assembly has moving parts that require scheduled maintenance at approximately every 800-1500 hours for maximum performance.
- **Aircraft Quality Aluminum Case.** The Pulse X1 is enclosed in high-quality aluminum for maximum protection of the internal system, durability, and professional appearance.
- **Attachable Wheels.** The Pulse X1 comes with attachable caster wheels for easy room-to-room transport.
- **Three Year Warranty.** All of our machines are backed by the protection of our complimentary 3-year Limited Warranty.

Who purchases the Pulse X1?

The Pulse X1 is a robust and versatile midsized machine, great for anyone interested in using two accessories at once. Typical owners of the Pulse X1 are Doctors, Chiropractors, Wellness Care Professionals, and other individuals who want a mid-tier PEMF experience.

Pulse EQ-X1

- **Mechanical Machine, Powered by Spark Gap.** The EQ-X1 uses a spark gap between two adjustable terminal rods to generate a mechanical pulse range. More space between the terminals generates a higher pulse strength and lower pulse rate while less space between the terminals generates a pulse with less strength at a higher pulse rate.
- **Strength.** With approximately 40% more strength than the Pulse EQ-X and Pulse EQ-XX, this versatile machine is the perfect midsized machine.
- **Both MFS and PPS Settings are controlled with a single knob.** Adjust the strength to your comfort and tolerance level with one simple knob.
- **Custom Timer with Display.** Set your timer as desired, from 2 to 90 minutes.
- **Dual Accessory Capability.** Power up to two accessories simultaneously with the Pulse EQ-X1's dual outlets, allowing for a more customizable experience.
- **Safety Accessory Plug.** The Pulse EQ-X1 comes with a safety accessory plug, as this machine is equipped with a safety feature that only distributes power when both plugs are fully seated.
- **Minimal Maintenance Required.** The spark gap assembly has moving parts that require scheduled maintenance at approximately every 800-1500 hours for maximum performance.
- **High-Impact Plastic Pelican Case.** The Pulse EQ-X1 is enclosed in high-quality, high-impact plastic for durability.
- **All-Terrain Wheels.** The Pulse EQ-X1 comes with an attachable, all-terrain, 6-inch-wheeled cart so you can take it with you anywhere.
- **Three Year Warranty.** All of our machines are backed by the protection of our complimentary 3-year Limited Warranty.

Who purchases the Pulse EQ-X1?

The Pulse EQ-X1 makes the versatility of the Pulse X1 available to our Equine customers. This machine is often purchased by Horse Trainers and Owners, Competitive Equine Riders & Athletes, and other individuals who want a mid-tier PEMF experience for their animals.

PULSEEQX1™

PULSEX™

Pulse X

- **Mechanical Machines, Powered by Spark Gaps.** The Pulse X uses a spark gap between two adjustable terminal rods to generate a mechanical pulse range. More space between the terminals generates a higher pulse strength and lower pulse rate while less space between the terminals generates a pulse with less strength at a higher pulse rate.
- **Strength.** This ultra-portable machine is our smallest spark-gap machine and provides enough strength to power any of our Pulse accessories .
- **Both MFS and PPS Settings are Contained in a Single Knob.** Adjust the strength to your comfort and tolerance level with one simple knob.
- **Infinity Timer.** The Pulse X has an infinity timer, which functions as a simple on-off switch.
- **Single Accessory Capability.** The Pulse X's single outlet design allows the user to power one accessory at a time.
- **Minimal Maintenance Required.** The spark gap assembly has moving parts that require scheduled maintenance at approximately every 800-1500 hours for maximum performance.
- **High-Impact Plastic Pelican Case.** The Pulse X is enclosed in high- quality, high-impact plastic for durability.
- **Lightweight Design with Shoulder Strap.** Our ultra-portable machine enables you to take PEMF Exercise on the go. At approximately 23 lbs with a shoulder strap included, the compact Pulse X machine makes traveling with PEMF easy.
- **Three Year Warranty.** All of our machines are backed by the protection of our complimentary 3-year Limited Warranty.

Who purchases the Pulse X?

Typical owners of the Pulse X are Doctors and Wellness Care Professionals who offer them as rental units to their customers as well as individuals who want the convenience of a PEMF machine in their own home. Because of its ultra-portability, The Pulse X is also frequently used by mobile Certified Pulse PEMF Professionals and by individuals with an on-the-go lifestyle.

Pulse EQ-X

- **Mechanical Machines, Powered by Spark Gaps.** The Pulse EQ-X uses a spark gap between two adjustable terminal rods to generate a mechanical pulse range. More space between the terminals generates a higher pulse strength and lower pulse rate while less space between the terminals generates a pulse with less strength at a higher pulse rate.
- **Strength.** This ultra-portable machine is our smallest spark-gap machine and provides enough strength to power any of our Pulse accessories.
- **Both MFS and PPS Settings are Contained in a Single Knob.** Adjust the strength to your comfort and tolerance level with one simple knob.
- **Infinity Timer.** The Pulse EQ-X has an infinity timer, which functions as a simple on-off switch.
- **Single Accessory Capability.** The Pulse EQ-X's single outlet design allows you to power one accessory at a time.
- **Minimal Maintenance Required.** The spark gap assembly has moving parts that require scheduled maintenance at approximately every 800-1500 hours for maximum performance.
- **High-Impact Plastic Pelican Case.** The Pulse EQ-X is enclosed in high-quality, high-impact plastic for durability.
- **Lightweight Design with Shoulder Strap.** Our ultra-portable machine enables you to take PEMF Exercise on the go. At approximately 23 lbs with a shoulder strap included, the compact Pulse EQ-X machine makes traveling with PEMF easy.
- **Three Year Warranty.** All of our machines are backed by the protection of our complimentary 3-year Limited Warranty.

Who purchases the Pulse EQ-X?

The Pulse EQ-X machine is popular with riders, horse and stable owners, and those looking for an entry-level PEMF machine for their animals.
