

Multi Factor Authentication (MFA)

MFA has been activated at your dealership. The first time you log in to DLRdmv you will need to send yourself an email which will authenticate your profile.

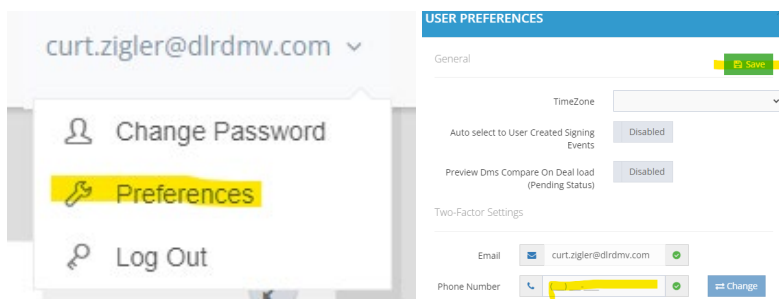

The first screenshot shows the DLRdmv logo and a 'Verification Code' input field. Below it, a 'Send Code Via:' dropdown menu is set to 'Email', and a green 'Submit' button is visible. The second screenshot shows the 'Verify Code' screen with the code '912044' entered in the 'Verification Code:' field, and a green 'Submit' button.

The system will email you a code that you can copy and paste into the form to access DLRdmv.

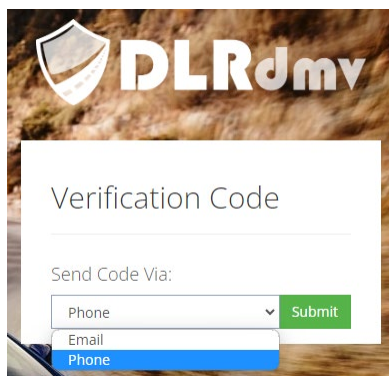

Now that you have logged into DLRdmv you can add your cell phone number to the system so that you can receive the verification code via text. This is not required, and you can keep it via email.

To add your cell phone number hover over your email address in the top right-hand corner and click preferences.

The first screenshot shows a user profile dropdown for 'curt.zigler@dlrdmv.com' with options for 'Change Password', 'Preferences', and 'Log Out'. The second screenshot shows the 'USER PREFERENCES' page with fields for 'TimeZone', 'Auto select to User Created Signing Events', 'Preview Dms Compare On Deal load (Pending Status)', 'Email', and 'Phone Number'.

Enter your cell phone number and click SAVE. Now you can receive the verification code via text or email from the drop-down menu.

The screenshot shows the DLRdmv logo and a 'Verification Code' input field. Below it, a 'Send Code Via:' dropdown menu is open, showing options for 'Phone', 'Email', and 'Phone'. A green 'Submit' button is visible.
